

WINTERIZATION INFORMATION

IMPORTANT NOTICE TO ALL DOCKING AND STORAGE CUSTOMERS. My River Home requires that the attached form be filled out, signed, and returned with a check prior to January 31st, 2009. We require that the attached form be received a minimum of one week prior to the date specified for winterization service. Verbal requests will not be accepted. My River Home will not accept any responsibility for freeze damage incurred subsequent to the first official freeze of the season, regardless of the date specified on the attached form. **My River Home also will not accept any responsibility for freeze damage to any boat not winterized and commissioned by our service department.**

THINGS TO REMEMBER

Drive units should be serviced once a year. For safety reasons, stern drive units cannot be serviced or inspected while the boat is in the water or on a lift. My River Home will not be responsible for damage to any drive unit not serviced by My River Home's service department personnel. **Drive units should not be left in the raised position over the winter months**, as water can collect in the exhaust housing where it could freeze and cause serious damage.

Engine manufacturers recommend changing the engine oil and filter at least once a year. My River Home recommends this service prior to winterization to provide protection over the winter months. Tune-ups are recommended in the spring when the boat is commissioned.

Fuel system stabilizer is strongly recommended to reduce fuel related problems related to winter storage. Stabilizer is available at the Ship Store or at the Service Department. It should be added to the last tank of fuel for the season, which will then thoroughly mix with the fuel and protect the entire fuel system.

IMPORTANT INFORMATION

1. **Keys must be in the boat**, and the location noted on the attached form. An additional charge of \$44.50 will be added if keys are not in the boat.
2. **Batteries must be fully charged for winter storage.** An additional charge of \$44.50 will be added for a dead battery.
3. **The holding tank must be empty prior to winterization.** My River Home does not perform this service.
4. **Please empty the fresh water tank.**
5. **The refrigerator should be empty.**
6. **All personal items should be stowed away so that they do not interfere with the winterization process.**

If you have any questions, please call the Service Department at 636-899-0903. Thank you for your assistance in helping us perform winterizations in an organized and timely manner.
